

"We are a service oriented business that focuses on taking care of our customers."

**— Charles E. Phipps
President**

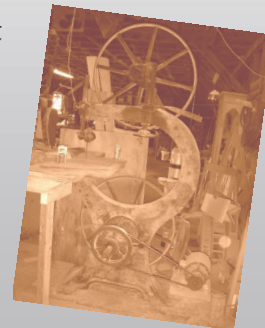

"We build and install quality, custom cabinets at an affordable price."

**— W. Timothy Phipps
Vice-President**

Our history begins with James R. C. Phipps, a self-taught carpenter, who crafted fine furniture throughout the Southeast during the Great Depression (1930's). James passed his woodworking skills and knowledge to his son, David E. Phipps. In 1972, David and his son, Charles E. Phipps, founded Phipps Cabinets, Inc.

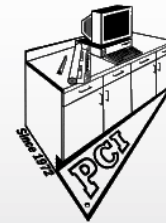

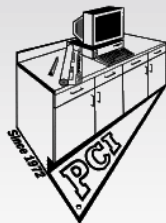

Today, Charles E. Phipps is president with his brother, W. Timothy Phipps, as vice-president.

We are well known in the industry for our ability to

produce quality custom cabinets at competitive prices, for your deadline sensitive projects.

Our project managers provide you with top-notch service from estimation of a project to its completion.

Our in-house design professionals use the latest computer-aided design (CAD) software to help you speed up the submittal process and create any desired, custom cabinet.

Our installers are the same skilled craftsmen that build the cabinets to insure a quality installation of the cabinets to meet your fast-track project needs.

At Phipps Cabinets, Inc., we understand the importance of servicing our customers and pride ourselves in offering outstanding service to you.

The state-of-the-art, computerized equipment and the time-efficient production facility allows us to reduce the cost and time of producing cabinets and pass those savings on to you.

Our large inventory permits us to provide the shortest lead time in the industry.

We utilize a large warehouse space to protect and store your product before installation.
